## Bosch - Global

- Some in house built solutions
- Multiple divisions running Multiple solutions
- Looking at evaluating and selecting a global solution

#### Customer Business Model

B2B

B2C

B2B2C

D2C

# Client Reference: Automotive

## Key Challenge

- Scale Bosch Mobility's L.OS marketplace with a **speedy expansion to Europe and North America taking into consideration local customization requirements.**

## Why Spryker Won

- Delivery of an **outstanding PoC in scope and in time**
- Strongest product on roadmap to offer B2X, Marketplace and other business models out of one OS
- Composable commerce capabilities and modularity approach allows Bosch to use their existing solution and extend capabilities with Spryker modules

## Spryker Solution

- Spryker's composable commerce capabilities help Bosch Mobility to accelerate the platform's implementation in Europe and North America **with one central backend to operate globally, driving digital transformation and growth in key markets.**
- Spryker's modular architecture allows for easy customization and ensures platform is tailored to the unique requirements of the target markets, delivering a more personalized experience to customers.
- Spryker's cloud-based infrastructure provides scalability and reliability.

# Unified CX for B2B High Tech & Manufacturing

## Why the business was struggling

- X Disconnected, siloed systems and applications
- X No single, unified single "source of truth" for Customers regarding products, orders, etc.
- X Poor Customer experience as a result of disconnected nature of ecosystem
- X Currently has basic Magento solution running in ASIA/ LATAM and looking to review strategy

## How Spryker addressed the problem

- Solution consulting and design guidance across business and technology requirements
- Provide a composable commerce platform to rapidly unify ecosystem
- Consolidate and optimize integrations
- e-commerce enable everything

## What will be achieved

- ✓ Consolidate Ricoh's digital footprint, especially around e-commerce
- ✓ Enhance Customer experience and improve adoption rate
- ✓ Optimize operational tooling and processes
- ✓ Utilize Spryker to connect and unify 5 distinct key projects
- ✓ Launch new CX Portal on Spryker

# Client Reference - B2B - Engineering

## Why the business was struggling

- X Stuck within outdated commerce technology
- X Unable to deliver on custom-built use cases such as IoT
- X Existing technology did not pair with agile mindset
- X Running SAP Commerce cloud in other regions

*Due to the modular architecture, Spryker allows a fast start in dismantling legacy ecommerce solution and integration in existing IT landscapes. The clean headless approach and the modular backend is key for a fast, smooth and inexpensive for integration in existing IT landscapes, since adapting to business needs is key for success.*

## How Spryker addressed the problem

- Spryker B2B capabilities such as bulk ordering, multi-store, customer segmentation, and more
- Spryker technology is made for agile product development
- Supports global business with needed internationalization features

## What has been achieved so far

- ✓ 8 Shops on Spryker
- ✓ Live and operating in Africa & Asia
- ✓ Foundation set for integration of sales processes into digital commerce

*Marc Dassler, former Head of Digital Platforms, Hilti*

# Customer Use Cases

Some of the complexities Spryker is solving for

**poolwerx**  
for healthy pool people

**Business  
adaptations**

**Franchising  
model**

**Geographic  
expansion**

**Pools are a  
living beast**

#### Customer Business Model

B2B

B2C

B2B2C

D2C

# Client Reference: Automotive

## Key Challenge

- ZF aimed to create a connected ecosystem to connect the vehicle owner, workshop owners and their distributors in one ecosystem with a full marketplace beyond ZF products, integrating workshops' repair service offerings and allowing for booking of service appointments

## Why Spryker Won

- Delivery of an outstanding PoC in scope and in time
- Strongest product on roadmap to offer B2X, Marketplace and other business models out of one OS
- High knowledge of automotive industry with former executives from the industry on the team

## Spryker Solution

- A B2B2C marketplace model connecting all relevant players along the funnel in one ecosystem with
  - 800.000+ parts
  - 10.000+ workshop partners and
  - 100+ merchant partners

# Client Reference - B2B Marketplace

## Why the business was struggling

- ✗ Fragmented digital commerce
- ✗ Limited in addressing local needs centrally
- ✗ Complex shop environment with high TCO

## How Spryker addressed the problem

- Spryker's technology with dedicated B2B capabilities
- Integration with existing IT-stack such as SAP ERP
- One central backend to operate globally

## What has been achieved so far

- ✓ Global rollout within 3 months
- ✓ 800,000 SKU centrally orchestrated
- ✓ 41 frontend managed by one central team

**“Spryker’s modular solution provides the flexibility we need today to meet the global challenges of tomorrow.**

*Sebastian Schulmeister, Group lead e-Business Services,  
Jungheinrich AG*

#### Customer Business Model

B2B

B2C

B2B2C

D2C

# Client Reference: *Industrial Goods*

## Key Challenge

- Grimme relies on a *diverse network of big distributors as well as small shops in the countryside*. While establishing a D2C spare parts shop, Grimme wanted to *avoid a conflict with its important sales partners*.

## Why Spryker won

- Spryker's technology offering a multi-use case platform not limited to B2B but rather enabling all use cases (B2B, B2C, marketplace etc.) in one platform
- *80% of complex use cases can be covered OOTB*
- Composability allows for flexible development, headless
- Sophisticated search capabilities via OOTB partner integration (Elastic Search)

## Spryker Solution

- Together with Spryker, Grimme integrated distributors into its digital commerce ecosystem in a meaningful way *by adding distributors (as merchants) to the Grimme shop, resulting in higher flexibility for customers and additional business for distributors* and Grimme:
  - **Click & Collect:** Customers are able to buy items online and check availability in their nearest store
  - **Drop-shipping:** If an item was not available in store, *the distributor can trigger an order which is delivered right to the customer's site*

Grimme continuously tests new concepts and consequently builds a portfolio of digital offerings.

# Benefits utilizing Co-Innovations with Spryker

## Direct Influence

Co-Innovations are highly collaborative with the customer, so they have direct influence on how the functionality will work.

## Faster Timeline

Accelerate the development of a new feature rather than wait for its turn in the Spryker roadmap.

## Fully Supported

Spryker fully supports any Co-Innovation, the same as a regular roadmap feature. No extra cost. Under the same SLAs for the core product you have licensed.

## High Quality

Co-Innovations are developed using our strict quality gates like performance and regression testing. The core team does the development based on standards and best practices

## Continued Innovation

All future enhancements to the Co-Innovations as part of the Spryker roadmap are available for free.

## Future Proof

Ultimately, Spryker will cover all major use cases with Co-Innovations regardless of customer investment.
